The platform includes a health and wellness monitoring application and a management portal for data collection and analysis. Requiring no integration, access to the application can be granted instantly.

	
<b>Heart Rate</b>	<b>Oxygen Saturation</b>
	
<b>Respiration Rate</b>	<b>Mental Stress Level</b>
	
<b>Heart Rate Variability</b>	<b>Body Mass Index</b>
	<small>*based on manually fed age, height and weight</small>
	
<b>Blood Pressure</b> <small>(Coming Soon)</small>	<b>Trends and Historical View</b>

## Great End-user Experience

Just by looking at a smartphone camera users can measure a wide range of vital signs, including heart rate, oxygen saturation, respiration rate, mental stress, heart rate variability and soon, blood pressure. Users may also manually input age, weight, and height in order to calculate BMI levels.

The Binah Team app delivers end-users with a friendly and intuitive interface and provides data collection for historical analysis and trends. in addition to information on vital signs ranges.

The Binah Team app is available in 12 different languages, including English, French, Spanish, Chinese, Arabic, German, Portuguese, Italian, Japanese, Hebrew, Russian and Indonesian.

\*The Binah Team app supports iOS (iPhone 8 and above) and Android (9.0 and above) and can run on any Android mobile device launched during the last 3-4 years. Supports Windows laptops and desktops. Support for tablets available in Q4/2021.

## Wellness Management in Four Simple Steps

- 1 Upload your users' emails to the My Binah Team management portal.
- 2 Users instantly receive an email with a username, password and link to download the app.
- 3 Users can measure vital signs in a matter of seconds, at any time and from any location using their smartphone, laptop, or desktop.
- 4 Users can view personal trends, historical data and health indicators within the application.
- 5 Display comprehensive reports and rich visuals of your users' measurement data.

## How Binah.ai's Technology Works

Agnostic to age, skin color and gender, Binah.ai's technology uses a unique mix of signal processing and AI technologies to extract and analyze a signal taken from a person's face to deliver results, in under 1 minute. Binah.ai's five stress levels are calculated according to Baevsky's mental stress index.

## We Care About Privacy

The Binah Team application does not save images or input video streams used for measurement. Final measurement results are saved for historical purposes and user convenience. All results are secured, encrypted and accessible only by users and account admins with permission, which may be managed in account preferences.

Binah.ai is fully committed to the privacy and security of our customers and users and operates in compliance with GDPR requirements.

# Health. Care. Anywhere.

## Powering Applications that Shape the Future of Health and Wellness

Binah.ai's award-winning technology delivers on the company's vision and mission to allow for basic and universally accessible health and wellness services for everyone, anytime, anywhere. We are shaping the future of healthcare and wellness by transforming any smartphone, tablet or laptop into a vital signs monitoring tool. Binah.ai's technology has countless use cases that span fields including telemedicine, remote patient monitoring, primary care, personal and corporate wellness, preventive medicine, virtual trials, nursing homes, insurance and many more. Our technology is used by leading global organizations that understand that the latest technologies and connected services are the roadmap to personalized, streamlined, and universally accessible health services, empowering both organizations and personal users alike.
