

# The New Way to Extract Health Data Is Software-based

Making health data more accessible for better decisions at lower costs

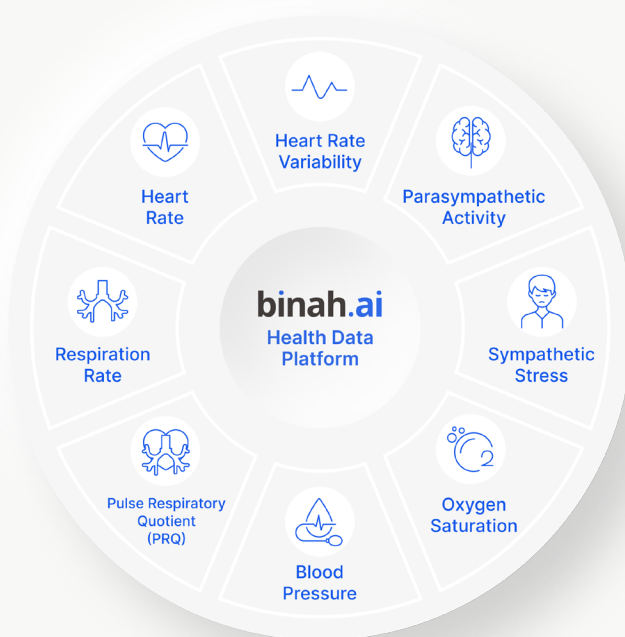

**Blood Pressure Monitoring Available Now!**

AI-powered Video-based Health Data Monitoring

## Transform Any Camera-equipped Device into a Health and Wellness Monitoring Tool

Binah.ai's award winning Health Data Platform offers healthcare providers an unparalleled advantage by transforming smartphones, tablets and laptops into health and wellness monitoring tools. Using Binah.ai's AI-powered, video-based, software-only solution, providers can remotely extract an extensive range of health measurements including blood pressure, heart rate, heart rate variability (HRV SDNN and RRI raw data), oxygen saturation, respiration rate, sympathetic stress, parasympathetic activity and pulse-respiration quotient (PRQ) with patient agreement.

## New! Blood Pressure Monitoring

You can now measure blood pressure, a leading risk factor for chronic diseases and health problems, using Binah.ai.

## Delivery

### Binah SDK (Software Development Kit)

- **NEW! Web Application Support:** Binah SDK is now compatible with Safari and Google Chrome browsers. No app needed.
- Easily integrate Binah.ai's technology into your own app or infrastructure.
- Supports: iPhone (8 and up), iPad (6th Gen and all iPad models released afterwards); Android 8.1 mobile devices; Windows 10 laptops and desktops.

### Binah Team - Ready-to-use Health and Wellness Monitoring Solution

- Includes a SaaS-based management platform and end-user application.
- Immediately available on a per-user model, no integration needed.
- Available for: iPhone (8 and up) and Android smartphones, Windows 10 laptops and desktops.
- **NEW!** Binah Team is now available through web application clients. No app download needed.

## Selected Use Cases for Healthcare, Pharma and Wellness

## Benefits for Healthcare Providers

- Eliminate the need for wearables and other dedicated hardware
- Seamlessly access digital, patient-provided, real-time health data, remotely or in person
- Reduce operational costs
- Free up time of care providers to increase quality of care
- Extend care outreach
- Empower decisions (CDSS) with real-time data
- Monitor health parameters intimately related to a broad spectrum of diseases, including cardiovascular and respiratory

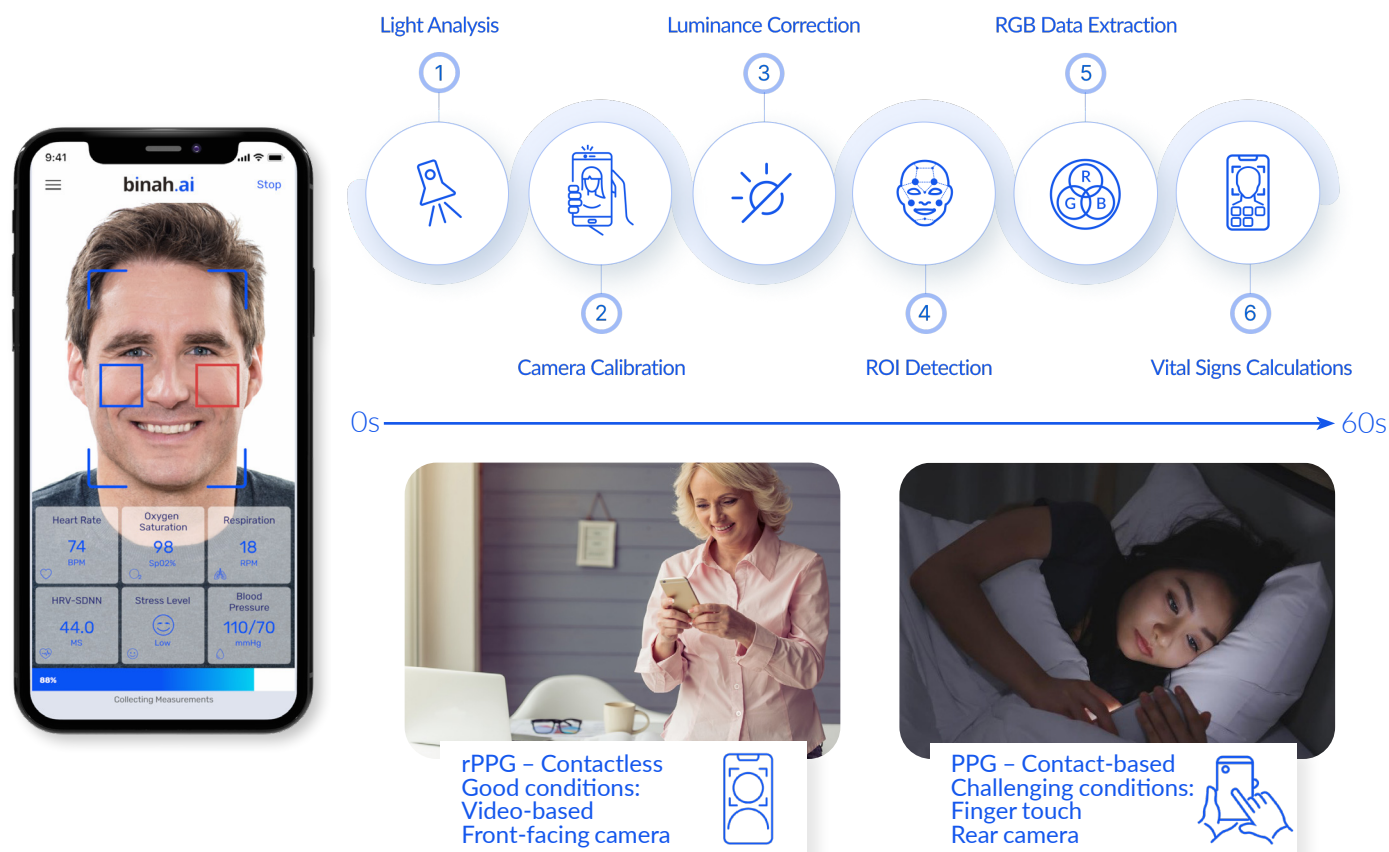

## Benefits for Patients

- Self-monitor health with extraordinary ease
- Monitor health status to increase treatment and medication adherence
- Reduce travel and time in crowded waiting rooms
- Track history and trends
- No need to purchase or adapt to new hardware

## How Binah.ai's Technology Works

Binah.ai uses a unique mix of signal processing and AI technologies to extract and analyze a video signal taken from exposed skin on the surface of a human face. Delivering consistent results in under one minute, Binah.ai's technology is agnostic to skin color and gender. Binah.ai offers two methods to extract health measurements: contactless and contact-based. The contactless extraction is based on a remote photoplethysmography (rPPG) signal, and the contact-based extraction, which may be done by placing a finger on the smartphone's rear camera, is based on a PPG signal. Binah.ai's stress measurements are calculated based on the Baevsky Stress Index.

## Health. Care. Anywhere.

Binah.ai's software-only, video-based Health Data platform is the next stage in the evolution of health and wellness monitoring. By eliminating the need for wearables and dedicated hardware devices and transforming smartphones, tablets and laptops into health and wellness monitoring tools, Binah.ai is enabling healthcare, insurance and wellness industries worldwide to access an extensive range of health measurements (blood pressure, heart rate, heart rate variability (HRV SDNN and/or RRI raw data), oxygen saturation, respiration rate, sympathetic stress, parasympathetic activity and pulse-respiration quotient (PRQ) just by having users look into their device's camera. Delivering on its vision and mission to support Health.Care.Anywhere, Binah.ai is making access to user-provided health data fast, simple and affordable and empowering organizations to provide quality, personalized care and services at lower costs.

### Why Binah.ai?

#### Always Available

May run locally on the device,  
without internet connection.

#### Seamless Integration

Delivered as an  
easy-to-integrate SDK  
or ready-to-use app.

#### Easy to use

Fast, easy, contactless.  
Health measurements are  
extracted in under a minute.

#### For All

Agnostic to age, gender  
and skin color.

#### Web Application Support

Compatible with Safari  
and Google Chrome.  
No app needed.

#### Proven

In use with tens of millions  
of end-users in the  
insurance, healthcare and  
wellness industries.

#### Accessible

No wearables needed.  
Available on smartphones,  
tablets and laptops.

#### No Privacy Concerns

Binah.ai does not save images or  
video streams. Final measurement  
results are secured and encrypted.
