

Binah Connect

When continuous health and wellness checks are essential

Harness the Power of Polar Electro and Binah.ai

Binah Connect, powered by Binah SDK, is a ready-to-use app that enables continuous monitoring of a comprehensive range of health and wellness indicators using a Polar Verity Sense™ heart rate sensor. Using Binah Connect, organizations can empower end users to continuously measure blood pressure, heart rate, heart rate variability (HRV), respiratory rate, sympathetic stress, parasympathetic activity, pulse respiratory quotient (PRQ), as well as Binah Wellness Score.

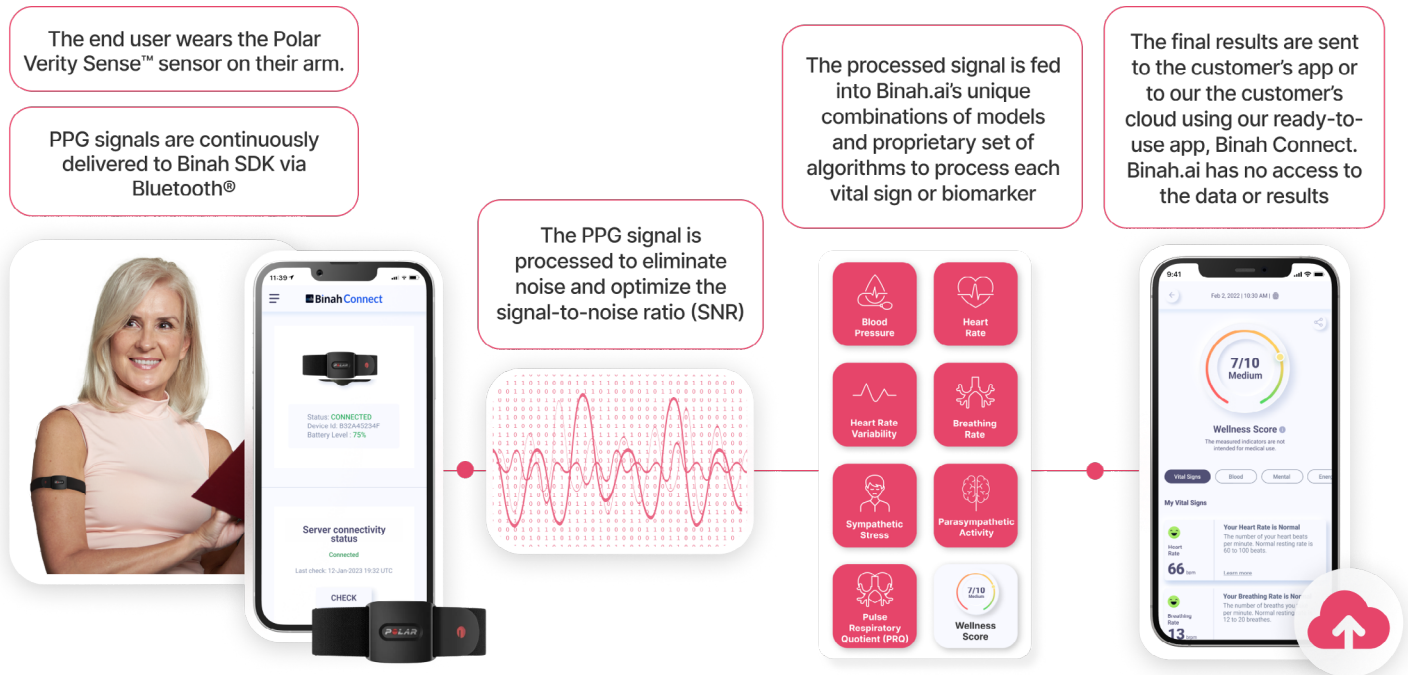

Binah Connect

- Ready-to-use app
- Supports a wide range of vital signs
- Blood tests coming soon
- Rigorously tested in lab conditions
- Runs checks every 3-120 minutes
- Supports all Fitzpatrick Scale skin tones
- Unique edge architecture, no cloud costs
- No privacy concerns
- Compatible with Android and iOS mobile, including iPads and web applications
- Equipped with user-friendly SaaS-based management portal
- Flexible business models

Cutting-Edge Technology: How It Works

End users simply connect their Polar Verity Sense™ sensor to the Binah Connect app on their mobile device via Bluetooth®. Once it is connected, they wear the sensor on their arm, while Binah Connect performs continuous health checks by obtaining and processing continuous PPG signals from the Polar sensor. The final measurement results are then delivered to the customer's cloud.

Unique Edge Architecture

The entire analysis is performed on the device to eliminate cloud costs and friction, while ensuring stable performance regardless of internet connectivity or speed. Our distinctive edge architecture also provides you with full ownership over data to safeguard your end users' data privacy and facilitate a smoother GDPR/HIPAA accreditation path.

Selected Use Cases for Continuous Monitoring

 Chronic Disease Management	 Remote and Home Care	 Elderly Care	 Employee Wellness
 Virtual Trials	 Critical Skills Operator Monitoring	 Sports and Fitness Tracking	 Sleep Analysis (Coming Soon)
